

# Minimum Requirements

Modernizing Medicine's **Electronic Medical Assistant<sup>®</sup> (EMA<sup>™</sup>)** can be accessed from any Internet-enabled computer that meets the following requirements.

| Specification                             | Currently Supported  |
|---|--|
| <b>Operating System</b>                   | Any capable of running Mozilla Firefox v20 or newer                        |
| <b>Processor</b>                          | 2 GHz Dual Core CPU <sup>1</sup>   |
| <b>Memory (RAM)</b>                       | 4 GB (minimum) / 8 GB ( <b>preferred</b> ) <sup>1</sup>                    |
| <b>Video Card (GPU memory)</b>            | 384 MB <sup>1</sup>  |
| <b>Screen Resolution</b>                  | 1280 x 1024 <sup>1</sup>   |
| <b>iPad</b>                               | iPad 2 (minimum) / iPad 4 or higher ( <b>preferred</b> )                   |
| <b>iPhone (for Pocket EMA)</b>            | iPhone 4 or newer, with latest iOS installed                               |
| <b>Web Browser</b>                        | Latest version of Mozilla Firefox <sup>2</sup>                             |
| <b>Web Browser PDF Plugin</b>             | Schubert PDF browser plugin (Mac OS)<br>Adobe PDF browser plugin (Windows) |
| <b>Internet Bandwidth</b>                 | 1 Mbps symmetrical for each device used to access EMA <sup>3</sup>         |
| <b>Local Area Network (LAN)</b>           | 100 Mbps   |
| <b>Wireless Local Area Network (WLAN)</b> | 5 GHz 802.11n (108 Mbps) or better <sup>4</sup>                            |

1. Hardware specs for Mac could be found on its System Profiler. For Windows, please visit <http://www.piriform.com/speccy>.

2. If you experience problems with EMA after installation of a Firefox update, please revert to a known good version of the browser.

3. This is in addition to the regular use of your Internet bandwidth. For example, you'll need 20 Mbps symmetrical for an office with 10 EMA devices, and 10 Mbps of regular Internet bandwidth use (your Internet Service Provider should be able to advise on the regular usage for your office).

4. Performing a wireless spectrum survey is recommended to ensure uniform, good quality wireless signal is available where EMA is to be used.

**Note:** Currently Supported is subject to change at Modernizing Medicine's discretion due to new available technologies.
