

modmed[®] **BOOST**

FOCUS ON YOUR PATIENTS, NOT YOUR OFFICE OPERATIONS

Are you among the 77% of physicians who spend too much time on office issues and not enough with patients?¹ Or the 96% whose billing processes are inefficient?²

Managing the business side of a practice can be overwhelming. But the good news is, we can help make it easier. Working together seamlessly with EMA[®], our modmed[®] BOOST solution can help manage your billing and streamline your operations.

By using a single vendor for your technology and services, you can experience greater efficiency and convenience than if you patch together different systems with expensive bridges. Join the community of EMA users leveraging our powerful, all-in-one solution to help them save time, gain peace of mind and improve financial visibility.

What Does modmed **BOOST** Include?

High-Tech Practice Management Software

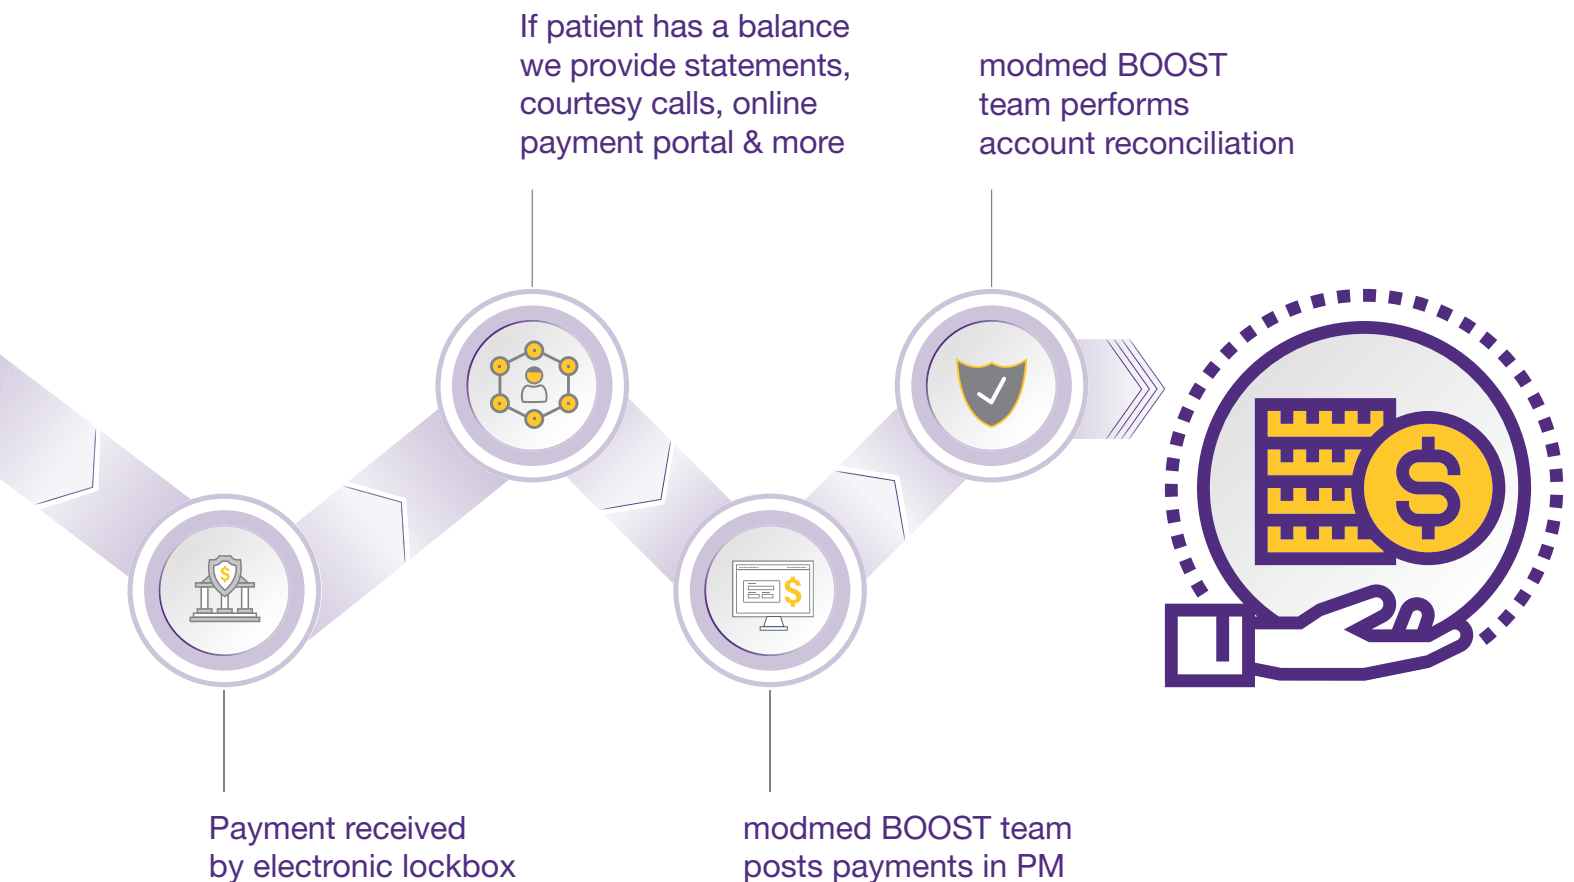

The first step to a healthier practice is having the right technology. When your clinical, financial and operational data are centralized in one easy-to-use system, your entire team can communicate better. Staff can not only schedule appointments and check in patients, but also collect balances, manage documents and view reports in seconds. modmed BOOST gives you just that—and so much more.

Here's how it works, from beginning to end:

High-Touch Business Operations Services

The second component of modmed BOOST is the right people. Our experienced specialists work as part of your team, managing claims and balances right within PM so you can see what's going on. Our goal is to keep you informed and in control, so we'll meet with you regularly to talk through your financial health reports. We'll even help you fix process issues and speed up your revenue cycle.

Ready to **BOOST** Your Practice Performance?

If you're not happy with your key billing metrics—or if you don't even know what they are—you're not alone. In fact, US doctors lose an estimated \$125 billion per year to poor billing practices¹. That's why practices across the nation are leveraging modmed BOOST.

Our people, processes and technology come together to help address inefficiencies and get your entire practice running more smoothly. In the end, this can give you more answers at your fingertips, more payments received on time, more happy patients and more time to spend treating them.

into your billing and financial health

"Implementation was smooth from the beginning, and my staff transitioned seamlessly due to the overwhelming support provided by Modernizing Medicine. We quickly saw improvement in office efficiencies and billing operations. The move to the all-in-one suite continues to be a great decision for the clinical and financial health of my practice."

— JESSICA KAPPELMAN, MD, MPH
