## The modmed® Ophthalmology Efficiency Challenge

Let's take a look at what's in our toolbox and see how it compares to your current system or one you're considering.

Considerations for Your Practice <sup>1</sup>	•	(Your Vendor)
Ease of Documentation		
Ophthalmologists can create custom protocols and dictate notes to save time—reducing the need to prepare charts prior to patient visits.	<b>✓</b>	
In-Depth Subspecialty Content		
Our comprehensive, cataract, cornea, refractive, glaucoma, retina, oculoplastic, neuro and pediatric subspecialty content was coded in by a team of ophthalmologists.		
Multi-Device Image Management		
Ophthalmologists can snap a photo with their iPad, upload images from compatible ophthalmic equipment, and annotate with their desktop mouse, keyboard or Apple pencil.		
Built-in Medical Coding		
Our EHR, EMA®, auto-suggests ICD-10 codes and eye codes based on your clinical documentation—without any translations, lookups or extra logins.		
Built-in Practice Management System		
Our Practice Management system makes it easy to track wait times, schedule appointments and manage documents and claims. There are no extra logins—even for the clearinghouse.		
Payment Processing		
Our solution provides multiple patient payment options (even HSA/FSA cards). Payments post directly to Practice Management.		
Built-In Premium Analytics		
Uses structured data to surface insights across your business, including in-depth financial and staff productivity metrics — without extra logins.		
Interoperability		
Our software interfaces with FlexSys™, ZEISS VERACITY, MDProspects™ and over 80 more.		
True Cloud Platform		
Our EHR backs up data and syncs it in real-time across multiple rooms and locations, helping to improve scalability.		
Professional Services & Implementation		
Our people and technology come together to provide multiple levels of client onboarding and award-winning <sup>2</sup> support Our team consists of educators, client advisors, coaches and specialists.		

<sup>&</sup>lt;sup>2</sup> 2020 Excellence in Customer Service Award: Technology of the Year. Annual 2019 Customer Sales and Service World Awards® | Best Use of Technology in Customer Service (Gold Winner).

<sup>&</sup>lt;sup>1</sup> Additional fees may apply.

## The modmed<sup>®</sup> Ophthalmology Efficiency Challenge

Let's take a look at what's in our toolbox and see how it compares to your current system or one you're considering.

Considerations for Your Practice <sup>1</sup>	<b>₩</b>	(Your Vendor)
Patient Engagement Suite		
Patients can schedule appointments, update their information, attend video visits, pay bills and supply valuable feedback—from almost anywhere they have an internet connection.	<b>~</b>	
Prescription Price Transparency EMA shows eligibility, benefits and formulary information, and attaches available coupons. GoodRX allows for additional price comparisons.		
Automated MIPS Tracking		
Track MIPS data within the clinical flow of the exam, report your MIPS data through our MIPS qualified registry and participate with our specialized registries.	<b>✓</b>	
IRIS Registry Reporting Our software integrates with the world's largest eye disease and condition registry and supports performance rate for quality and value-based modifier calculations. Practices can also report to our own qualified registry for MIPS.		
ASC Software		
Built-in customizable procedure documentation helps reduce double charting, and reports automatically populate across users. Vital signs integration can help reduce staff workload.		

<sup>&</sup>lt;sup>1</sup> Additional fees may apply.
