

Pain Management Software Checklist

Whether you're a one-provider practice or have multiple providers, these capabilities may matter. Our pain management-specific software has them—does yours?

Capabilities	How It May Help	Can Your Software Do This?
All-in-One System	When your EHR, practice management, payment platform and patient engagement software are all combined in a single platform, it can help streamline workflow and communications.	<input type="checkbox"/>
Built by Practicing Pain Management Physicians	Our on-staff pain management physicians program their medical knowledge into the software, creating a user-friendly and intuitive EHR ready to use right out of the box. Our EHR, EMA®, comes preloaded with 550+ chief complaints, 4,800+ diagnoses and 2,050+ plans and procedures.	<input type="checkbox"/>
Flexible Documentation	EMA's easy-to-use interface is designed to reduce unnecessary clicking and typing, helping to speed up your documentation. You can even save custom note information for commonly used diagnoses, plans and procedures, and create custom master visits to help you document a visit in just a few clicks.	<input type="checkbox"/>
Streamline Follow-up Patient Visits	With EMA you can pull forward previous visit note information to speed-up patient follow-up visits for medication refills or injections.	<input type="checkbox"/>
Automate Communication with Referring Providers	With EMA you can automatically fax visit note summaries to primary care or referring providers, eliminating administrative tasks and helping to streamline across the continuum of care.	<input type="checkbox"/>
Dictation with Nuance Healthcare	For physicians who prefer to dictate their notes, EMA offers clinical voice recognition powered by Nuance Healthcare that allows you to document three to five times faster than typing.	<input type="checkbox"/>
True Cloud Platform	A cloud system can help reduce certain IT expenses and lets you access records virtually anywhere you have a secure Internet connection.	<input type="checkbox"/>
Adaptive Learning Engine	EMA's learning engine adapts to the way you practice by remembering your preferences, helping you save time. As you move through the exam, EMA recognizes your top diagnoses based on the patients you usually treat and even suggests your preferred treatment plans.	<input type="checkbox"/>

Pain Management Software Checklist

Whether you're a one-provider practice or have multiple providers, these capabilities may matter. Our pain management-specific software has them—does yours?

Capabilities	How It May Help	Can Your Software Do This?
Automatic Coding Suggestions	During the exam, EMA populates the note with the information you document and creates a bill based on that documentation that includes suggested ICD-10, CPT, E&M and modifier codes for your review, helping you save time.	<input type="checkbox"/>
Paperless Office	With electronic customized consent forms, digital patient intake, electronic order logs, and electronic billing and coding; we can help you reduce staff burden and work towards a paperless experience from appointment scheduling until after the bill is paid.	<input type="checkbox"/>
Electronic Prescribing of Controlled Substances	Generate and queue ePrescriptions, including controlled substances, from both the iPad and web. You can easily view each patient's prescription history and identify potential drug interactions.	<input type="checkbox"/>
PDMP Database Search	Through an interface with Appriss Health's PMP Gateway ¹ , you can query state PDMP databases when prescribing controlled substances and analyze data associated with prescription history.	<input type="checkbox"/>
Prescription Drug Price Transparency	EMA's Formulary feature shows you eligibility, benefits and patient out-of-pocket costs, as well as alternative medication options. For cash pay patients, you can compare drug pricing through GoodRx and attach available eCoupons.	<input type="checkbox"/>
Award Winning Customer Support²	Our professionals can work closely with you through implementation, training and beyond. In 2019, our client services team handled over 9,500 support cases monthly and scored a 92% satisfaction rating. ³	<input type="checkbox"/>
Telehealth-Enabled EHR	With high-resolution video chat capabilities, seeing your patients—whether your office is open or closed—becomes easier.	<input type="checkbox"/>
Patient Engagement Tools	Our patient engagement portfolio, which includes our patient portal, patient mobile app, intake kiosk for iPad, self-scheduling, surveys, reminders and messaging, can be used to help alleviate data entry fatigue and keep the line of communication open with your patients.	<input type="checkbox"/>

¹ Appriss Health's PMP Gateway may not be available in certain states.

² 2020 CXps CX-Cequence Award; 2020 Excellence in Customer Service Awards: Technology of the Year – Business Intelligence Group

³ Based on Modernizing Medicine client survey information from January 1, 2019 - December 31, 2019. The survey had an 18% response rate.
