**MODERNIZING
MEDICINE**
Gastroenterology

A Suite of Solutions for All Care Settings

Whether you are a sole practitioner or part of a physician network or hospital, the gGastro® suite can help optimize your organization with its GI-specific offerings that extend far beyond an EHR system.

gGastro EHR

Award-winning, GI-specific EHR system that helps streamline workflow, enhance profitability, meet compliance requirements and improve patient care

gPM™

Innovative practice management solution designed to enhance workflow efficiency and process effectiveness

modmed® gBOOST

Advanced Business Operations Services to help you manage your medical billing and revenue cycle

gGastro ERW

Endoscopy report writer system to expedite and elevate the reporting process

gInsights™

An analytics platform that digs deep into provider behaviors, outcomes and practice operations to help improve the clinical, financial and operational aspects of your practice

gAdvisor™

Receive personal guidance from a certified MIPS coach who specializes in gastroenterology compliance and can help guide you to success

gKiosk™

Streamline patient check-in, checkout and discharge with an iPad, making the process simpler for your office staff and more engaging for your patients

gPortal™

Improve communication between physicians and patients with this online patient engagement tool

gReminder™

Patient reminder system integrated directly into gGastro for patients to confirm appointments conveniently

gGastro MOBILE

Easily search for and review patient information on the go with this innovative mobile app solution. Available for iOS and Android devices

Value-Based Care Solutions

Under MIPS, your income depends on your ability to show high quality and low cost compared to your peers. With a distinguished track record in GI value-based care, including MIPS submissions, MU attestations and PQRS reporting, Modernizing Medicine® Gastroenterology has your back. Our MIPS solutions can show how your practice is performing, streamline data collection and submission, and even pair you with a skilled team of advisors to help you excel.

gInsights™

Robust Analytics Platform

Our analytics solution goes beyond superficial data, offering an actionable look into your clinical, financial and operational performance. With interactive reports, patient population management and real-time peer benchmarking, you'll be able to understand and optimize your practice.

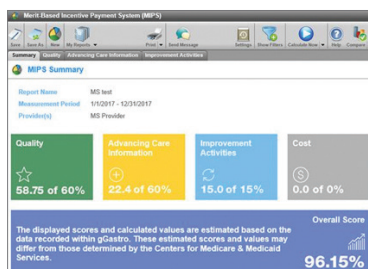

Discover trends within

- **Your Referring Physician Population:** Who sends the most patients? Whose patients are often no-shows?
- **Your Staff:** Who schedules the most appointments for screening colonoscopies? Is there a difference in same-day cancel rate depending on scheduler?
- **Your Providers:** What is the average task completion time? Does endo room turnaround time vary by provider? Do all providers have a healthy ratio of ADR to withdrawal time?

Gain convenient access to accurate analytical reporting

- Benchmarking against peers in real time
- Patient population management
- Clinical data
- Billing and financial information
- Operational systems
- Compliance

MIPS scorecard and benchmarking

- Track your MIPS Composite Score and adjust processes as needed
- View progress in each category/measure

gAdvisor™

Personalized MIPS coaching

Easily navigate MIPS with personalized support. A certified MIPS expert will help you build and execute your plan for meeting MIPS requirements, so you can save time and gain peace of mind.

With our gAdvisor services, you'll receive:

- A dedicated MIPS advisor
- MIPS preparation and goals training
- A checkpoint call per month with post-call summary
- Unlimited email support from your MIPS gAdvisor
- Remote assistance during submission

Medical Office EHR

Our gGastro EHR system and gGastro ERW (Endoscopy Report Writer) were built specifically for your gastroenterology practice's needs. Preferred by gastroenterologists nationwide, gGastro helps streamline workflow, enhance profitability, meet compliance requirements and improve patient care.

gGastro® EHR

GI-Specific EHR System

- Built-in MIPS data collection and scorecard
- Easy-to-learn interface with customizable notes
- Speech-to-text
- Automatic ICD-10, CPT and modifier code suggestions
- GI-specific task workflow and knowledge base
- Interfaces with regional health systems
- GIQuIC support
- Clinical decision support
- One-click visit note finalization

#1 Gastro-specific EHR

for 9 consecutive years

gGastro is a fully integrated reporting platform that combines the attributes of an EHR system and procedure report writer in one solution for practices, ASCs and hospitals.

gGastro®
MOBILE

Take the Leading
EHR System
Wherever You Go

Procedural Documentation

Our ERW can operate as a stand-alone product or can be integrated with our gGastro EHR system. By providing existing information from the gGastro EHR at the time of the procedure, our ERW allows your team to update key patient data without duplicate entries, helping to streamline operations and promote safety.

gGastro® ERW

Optimize Your Endoscopy Reports

Procedure documentation in under 2 minutes

- One-click documentation
- ADR and other quality metrics
- Upper and lower endoscopy
- Diagnostic and therapeutic procedures
- Paperless Nursing Notes
- Automated anesthesia billing

Reduce management burden

- Pathology samples management
- Quality and state reporting (ASC-9/10, etc.)
- Interfacing with CAHPS-approved vendors
- GIQuIC integration

When used with the EHR module

- Patient recalls automatically logged in office for tracking
- One chart between office and ASC

Financial Health Management

It can be hard to focus on keeping patients healthy when you're not confident in the health of your billing and office processes. Our solutions help manage and streamline them, so you can enjoy improved office flow while focusing on what matters most—your patients.

gPM™

Practice Management System

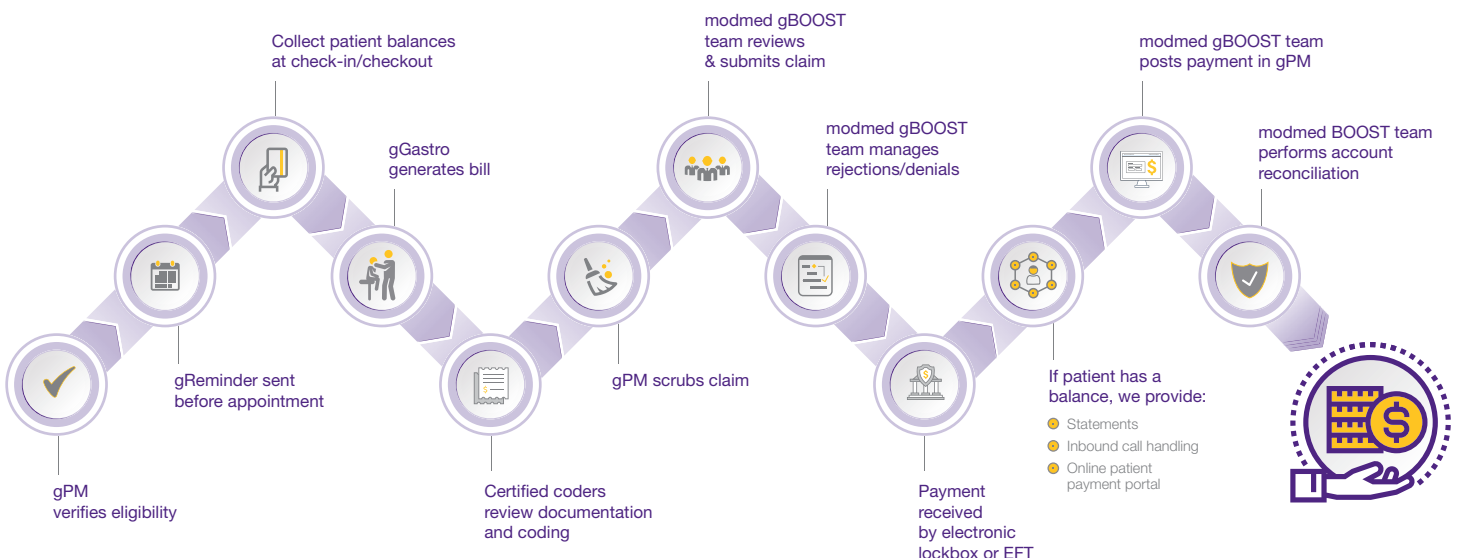

Tailored specifically to gastroenterology workflows, gPM connects with your GI practice, endo center or both to centralize your medical and financial data in one system.

- Support for multiple business units with a single patient demographics profile
- Professional (HCFA) and facility (UB-04) billing on a single platform
- Template-driven scheduling
- Patient payment plans to provide added flexibility and convenience
- Real-time insurance eligibility verification
- Compatible with certain OCR scanning for driver's licenses and insurance cards

modmed® gBOOST

Profit from our years of medical billing expertise. As part of our **Business Operations Services**, our specialists can manage your billing and collections right in gPM, giving you visibility at every step. Plus, your dedicated client manager will meet with you monthly to talk through your financial health reports and even help you fix process issues. With our team working on your behalf, you can free up your focus, achieve transparency and gain peace of mind.

Patient Engagement

Consistently, studies find that patients who take an active role in their own care tend to have better outcomes than those who don't. And under MIPS, your ability to engage patients can even substantially impact your reimbursements. That's why we provide three crucial tools—gKiosk, gPortal and gReminder—that empower your patients to be more involved in their healthcare management.

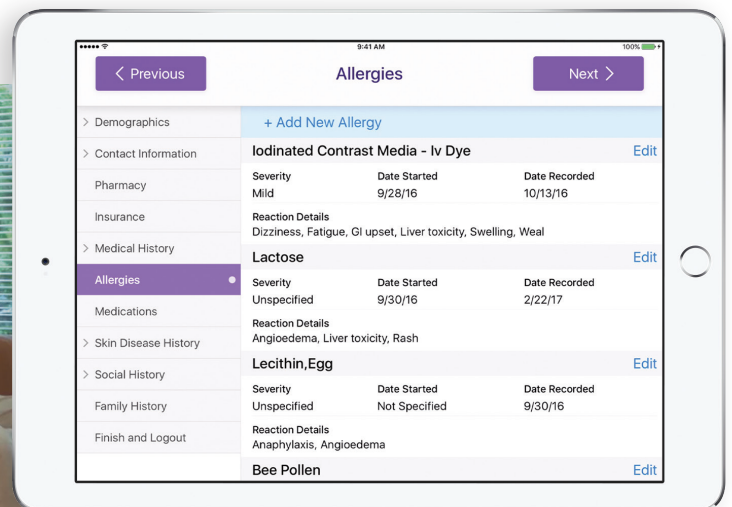

gKiosk™

iPad Check-In & Checkout App

End the paperwork shuffle, increase mobility and enhance patient engagement by letting patients fill out consent forms, waivers, demographics and more on an iPad. There's no need for staff to enter the data manually; gKiosk adds it straight into gGastro and gPM.

- Speed up patient check-in, checkout and discharge
- Improve patient and staff satisfaction
- Reduce duplicate entries, human error and staff administrative burden

With gKiosk, Center for Digestive Health saves 10 minutes for each existing patient

gPortal™

Online Patient Engagement Portal

Allow patients access to our HIPAA-compliant patient portal to manage appointments, send private messages, review medical records and more—virtually anytime, anywhere.

gReminder™

Patient Appointment Reminder Service

Give patients a convenient way to confirm appointments while helping optimize provider and staff time. Our solution includes appointment reminder calls and text messages customized for your physician and location preferences, along with professional voice recordings available in English and Spanish.

Interfaces

gGastro interfaces with health systems to coordinate patient care and save your staff time. Our EHR system can receive electronic results from:

- Clinical labs such as Labcorp, Quest, HIEs and others
- Pathology systems and labs
- Radiology clinics
- Hospital systems on Epic, Cerner, Meditech, Allscripts, McKesson and more*

“HERE’S WHAT YOUR PEERS ARE SAYING”

It’s so intuitive and follows the way doctors think. There are a lot of subtleties in it for customization, but it’s repetitive and gives you a high-quality note without requiring a long learning curve.

Richard Aycock, MD

Senior Vice President of Gastro One

Our gAdvisor’s insightful recommendations have helped us navigate the ever-changing reporting requirements...We highly recommend this service for any GI practice.

Jackie Goldberg, Practice Manager

Digestive Disorders Associates

I think the ease of use is the biggest benefit. It’s very well designed and integrated. They’ve made these products easy to learn, navigate and enter in orders while being able to communicate seamlessly with the front office.

Michael DiMarino, MD

DiMarino-Kroop-Prieto
Gastrointestinal Associates
