

The modmed[®] Urology Efficiency Challenge

Let's take a look at what's in our toolbox and see how it compares to your current system or one you're considering.

Considerations for Your Practice ¹		<u>(Your Vendor)</u>
Automated MIPS Tracking Track MIPS data within the clinical flow of the exam, report your MIPS data through the Modernizing Medicine [®] Qualified Registry and participate with our specialized registries.		<input type="checkbox"/>
Registry Reporting The Modernizing Medicine registry supports submission of MIPS Quality, Promoting Interoperability, and Improvement Activity data.		<input type="checkbox"/>
Lab Partners EMA interfaces with over 200 pathology labs, as well as two major clinical labs. This allows you to send orders directly to the lab and receive electronic results, which can help save time and reduce manual data entry.		<input type="checkbox"/>
Population Health EMA solutions make it easier to identify at-risk patients, manage those with specific conditions and make data-driven decisions.		<input type="checkbox"/>

¹ Additional fees may apply.

If your practice isn't as efficient as it could be, consider modmed[®] Urology
